## PROJECTS

---

SSO | PHP, Laravel, MySQL

Feb 2026 — Present

- Designed and implemented a secure Single Sign-On (SSO) architecture in Laravel, enabling seamless authentication across multiple internal modules using centralized user management and token-based session handling.
- Built a scalable authentication flow using JWT/session-based auth, secure password hashing (bcrypt/Argon2), CSRF protection, and role-based access control (RBAC) to ensure secure cross-application access.
- Engineered inter-module account provisioning logic, allowing users to select services at registration and automatically receive authorized access to selected modules with synchronized credentials.

Exchangify | Next.js, Typescript, Tailwind CSS, MongoDB Atlas, Mongoose, NextAuth.js, Cloudinary Feb 2026 — Feb 2026

- Co-founded and developed Exchangify, a modern peer-to-peer exchange platform designed to facilitate secure, trust-based swaps between users.
- Debugged the app and fixed all the bugs that are present.
- Developed the full backend.

Rewind | Next.js, React, Typescript, Tailwind CSS, Firebase

Feb 2026 — Feb 2026

- Co-founded and developed Rewind, a platform designed to analyze and reconstruct trends, patterns, and key moments from previous years.
- Debugged the app and fixed the bugs that are present
- Implemented all the backend functionality of the app

CodeBattles | React, Tailwind CSS, Zustand, Socket.io, Python Flask

Jan 2026 — Jan 2026

- Co-founded and developed CodeBattles, a real-time competitive programming platform where users solve algorithmic challenges and earn in-game effects (e.g., damage boosts, defense enhancements, debuffs) to influence match outcomes.
- Designed and implemented backend architecture using scalable APIs, real-time event handling, and efficient problem validation logic to support low-latency multiplayer interactions.

BudgetBuddy | Express.js, Tailwind CSS, Chart.js, shadcn/ui, Flutter, Node.js,

Jan 2026 — Jan 2026

- Co-developed BudgetBuddy, a budgeting website and application focused on simplifying personal finance and promoting smarter financial decision-making.
- Collaborated in a fast-paced hackathon environment to translate ideas into a functional prototype within limited time constraints.
- Worked across frontend, backend and application logic, contributing to core features and overall product architecture.

Portfolio website | HTML, CSS, JS

Dec 2025 — Present

- A modern, performance-focused personal portfolio website designed to showcase my projects, technical skills, and achievements in a clear and professional way.

WCDAT Core | HTML, CSS, WordPress
